Policy: Anaphylaxis		
Date of next Review: 2025	Bright P-12 College Policy	Date Approved: 13th December 2024
Responsible for review: OH&S Manager	Harden	Approving Authority : Principal

PURPOSE

To explain to Bright P12 College including parents, carers, staff and students the processes and procedures in place to support students diagnosed as being at risk of suffering from anaphylaxis. This policy also ensures that Bright P12 College and the Dinner Plain Campus is compliant with Ministerial Order 706 and the Department's guidelines for anaphylaxis management.

SCOPE

This policy applies to:

- all staff, casual relief staff and volunteers
- all students who have been diagnosed with anaphylaxis, or who may require emergency treatment for an anaphylactic reaction, and their parents and carers.

KEY ACTIONS

Office staff

Location of Plans and Adrenaline Autoinjectors

1. *Storage:* Store Individual Anaphylaxis Management Plans and ASCIA Action Plans at the Administration Building with the student's adrenaline autoinjector.

2. *Labelling:* Ensure autoinjectors are labelled with the student's name.

3. *General Use:* Maintain general use of adrenaline autoinjectors at the Administration Building.

Leadership

Communication Plan

1. *Policy Availability:* Make the policy available on the school website and provide copies to parents of at-risk students.

2. Staff Awareness: Ensure all relevant staff, including casual relief staff and volunteers, are aware of the policy and procedures.

3. *Training and Briefing:* Conduct training and briefings for staff on anaphylaxis management at least twice a year.

Staff Training

1. Training Requirements: Ensure staff complete approved anaphylaxis management training courses.

2. *Briefings:* Conduct briefings on the policy, causes, symptoms, treatment, and emergency response procedures.

3. Record Keeping: Maintain records of staff training and briefings in the OHS Training Planner.

Anaphylactic Coordinator

Individual Anaphylaxis Management Plans

1. **Development**: Ensure YLCs and classroom teachers create an Individual Anaphylaxis Management Plan for each diagnosed student in consultation with parents/carers.

2.**Notification:** Ensure parents provide an ASCIA Action Plan, updated medical information, a current photo, and a current adrenaline autoinjector.

3.*Review:* Plans are reviewed annually or when there are changes in the student's condition or after an anaphylactic reaction.

General Use Adrenaline Autoinjectors

1. *Supply:* Maintain a supply of general use adrenaline autoinjectors.

2.*Responsibility:* The Anaphylactic Coordinator arranges the purchase and ensures availability in different locations and for off-site activities.

All Staff

Risk Minimisation Strategies

1. *Hygiene*: Remind staff and students to wash hands after eating.

2. *Food Sharing*: Discourage sharing of food.

3. *Waste Management*: Keep garbage bins covered and use gloves for picking up rubbish.

4. *Canteen Training*: Train canteen staff in appropriate food handling.

5. *Event Planning*: Inform year groups of allergens to avoid and plan for off-site activities with risk minimisation strategies.

Emergency Response

1. *Immediate Actions*: Lay the person flat, administer an EpiPen, call an ambulance, and contact emergency contacts.

2. *First-Time Reactions*: Follow emergency steps even if the student has not been previously diagnosed.

3. **Device Use:** Use either EpiPen[®] or Anapen[®] as needed, and prioritise correct dosage based on the student's weight.

Bright P12 College will fully comply with Ministerial Order 706 and the associated guidelines published by the Department of Education and Training.

Anaphylaxis

Anaphylaxis is a severe allergic reaction that occurs after exposure to an allergen. The most common allergens for school-aged children are nuts, eggs, cow's milk, fish, shellfish, wheat, soy, sesame, latex, certain insect stings and medication.

Symptoms

Signs and symptoms of a mild to moderate allergic reaction can include:

- swelling of the lips, face and eyes
- hives or welts
- tingling in the mouth.

Signs and symptoms of anaphylaxis, a severe allergic reaction, can include:

- difficult/noisy breathing
- swelling of tongue
- difficulty talking and/or hoarse voice
- wheeze or persistent cough
- persistent dizziness or collapse
- student appears pale or floppy
- abdominal pain and/or vomiting.

Symptoms usually develop within ten minutes and up to two hours after exposure to an allergen, but can appear within a few minutes.

Treatment

Adrenaline given as an injection into the muscle of the outer mid-thigh is the first aid treatment for anaphylaxis.

Individuals diagnosed as being at risk of anaphylaxis are prescribed an adrenaline autoinjector for use in an emergency. These adrenaline autoinjectors are designed so that anyone can use them in an emergency.

Individual Anaphylaxis Management Plans

All students at Bright P12 College and Dinner Plain Campus who are diagnosed by a medical practitioner as being at risk of suffering from an anaphylactic reaction **must have an Individual Anaphylaxis Management Plan. When notified of an anaphylaxis diagnosis, - Secondary - Year Level Coordinator & Primary - Classroom Teacher of Bright P12 College is responsible for developing a plan in consultation with the student's parents/carers.**

Where necessary, an *Individual Anaphylaxis Management Plan* will be in place as soon as practicable after a student enrols at Bright P12 College and where possible, before the student's first day. **Parents and carers must:**

• obtain an ASCIA Action Plan for Anaphylaxis from the student's medical practitioner and provide a copy to the school as soon as practicable

- immediately inform the school in writing if there is a relevant change in the student's medical condition and obtain an updated ASCIA Action Plan for Anaphylaxis
- provide an up-to-date photo of the student for the ASCIA Action Plan for Anaphylaxis when that Plan is provided to the school and each time it is reviewed
- provide the school with a current adrenaline autoinjector for the student that has not expired;
- participate in annual reviews of the student's Plan.

Each student's Individual Anaphylaxis Management Plan must include:

- information about the student's medical condition that relates to allergies and the potential for anaphylactic reaction, including the type of allergies the student has
- information about the signs or symptoms the student might exhibit in the event of an allergic reaction based on a written diagnosis from a medical practitioner
- strategies to minimise the risk of exposure to known allergens while the student is under the care or supervision of school staff, including in the school yard, at camps and excursions, or at special events conducted, organised or attended by the school
- the name of the person(s) responsible for implementing the risk minimisation strategies, which have been identified in the Plan
- information about where the student's medication will be stored
- the student's emergency contact details
- an up-to-date ASCIA Action Plan for Anaphylaxis completed by the student's medical practitioner.

Review and updates to Individual Anaphylaxis Management Plans

A student's Individual Anaphylaxis Management Plan will be *reviewed and updated on an annual basis in consultation with the student's parents/carers.* The plan will also be reviewed and, where necessary, updated in the following circumstances:

- as soon as practicable after the student has an anaphylactic reaction at school
- if the student's medical condition, insofar as it relates to allergy and the potential for anaphylactic reaction, changes
- when the student is participating in an off-site activity, including camps and excursions, or at special events including fetes and concerts.

Our school may also consider updating a student's Individual Anaphylaxis Management Plan if there is an identified and significant increase in the student's potential risk of exposure to allergens at school.

Location of plans and adrenaline autoinjectors

A copy of each student's Individual Anaphylaxis Management Plan will be stored with their ASCIA Action Plan for Anaphylaxis at Administration Building, together with the student's adrenaline autoinjector. Adrenaline autoinjectors must be labelled with the student's name. Adrenaline autoinjectors for general use are also kept in the Administration Building.

Risk Minimisation Strategies

To reduce the risk of a student suffering from an anaphylactic reaction at Bright P12 College, we have put in place the following strategies:

- staff and students are regularly reminded to wash their hands after eating;
- students are discouraged from sharing food

- garbage bins at school are to remain covered with lids to reduce the risk of attracting insects
- gloves must be worn when picking up papers or rubbish in the playground;
- school canteen staff are trained in appropriate food handling to reduce the risk of cross-contamination
- year groups will be informed of allergens that must be avoided in advance of class parties, events or birthdays
- a general use EpiPen will be stored at the school office
- Planning for off-site activities will include risk minimisation strategies for students at risk
 of anaphylaxis including supervision requirements, appropriate number of *trained staff*,
 emergency response procedures and other risk controls appropriate to the activity and
 students attending.

Adrenaline autoinjectors for general use

[Note: for guidance on the appropriate number of general use adrenaline autoinjectors for your school, refer to chapter 10 of the Department's <u>Anaphylaxis Guidelines</u>]

Bright P12 College will maintain a supply of adrenaline autoinjector(s) for general use, as a back-up to those provided by parents and carers for specific students, and also for students who may suffer from a first time reaction at school.

Adrenaline autoinjectors for general use will be stored at Administration Building and labelled "general use".

The Anaphylactic Coordinator is responsible for arranging the purchase of adrenaline autoinjectors for general use, and will consider:

- the number of students enrolled at Bright P12 College at risk of anaphylaxis
- the accessibility of adrenaline autoinjectors supplied by parents
- the availability of a sufficient supply of autoinjectors for general use in different locations at the school, as well as at camps, excursions and events
- the limited life span of adrenaline autoinjectors, and the need for general use adrenaline autoinjectors to be replaced when used or prior to expiry.

Emergency Response

In the event of an anaphylactic reaction, the emergency response procedures in this policy must be followed, together with the school's general first aid procedures, emergency response procedures and the student's Individual Anaphylaxis Management Plan.

A complete and up-to-date list of students identified as being at risk of anaphylaxis is maintained by Administration Staff and each teacher receives a copy along with School Leadership staff. For camps, excursions and special events, the Teacher in Charge will be responsible for maintaining a list of students at risk of anaphylaxis attending the special event, together with their Individual Anaphylaxis Management Plans and adrenaline autoinjectors, where appropriate.

If a student experiences an anaphylactic reaction at school or during a school activity, school staff must:

Step	Action	
1.	Lay the person flat	
	 Do not allow them to stand or walk 	

	• If broothing is difficult, allow there to sit		
	 If breathing is difficult, allow them to sit 		
	Be calm and reassuring		
	 Do not leave them alone Sock assistance from another staff member or reliable student to leave the 		
	• Seek assistance from another staff member or reliable student to locate the		
	student's adrenaline autoinjector or the school's general use autoinjector, and		
	the student's Individual Anaphylaxis Management Plan, stored at		
	Administration Building		
	• If the student's plan is not immediately available, or they appear to be		
	experiencing a first-time reaction, follow steps 2 to 5		
2.	Administer an EpiPen or EpiPen Jr (if the student is under 20kg)		
	Remove from plastic container		
	 Form a fist around the EpiPen and pull off the blue safety release (cap) 		
	Place orange end against the student's outer mid-thigh (with or without		
	clothing)		
	 Push down hard until a click is heard or felt and hold in place for 3 seconds 		
	Remove EpiPen		
	 Note the time the EpiPen is administered 		
	• Retain the used EpiPen to be handed to ambulance paramedics along with the		
	time of administration		
	OR		
	Administer an Anapen [®] 500, Anapen [®] 300, or Anapen [®] Jr.		
	Pull off the black needle shield		
	 Pull off grey safety cap (from the red button) 		
	 Place needle end firmly against the student's outer mid-thigh at 90 degrees 		
	(with or without clothing)		
	 Press red button so it clicks and hold for 3 seconds 		
	·		
	Note the time the Anapen is administered		
	Retain the used Anapen to be handed to ambulance paramedics along with the time of		
	administration		
3.	Call an ambulance (000)		
4.	If there is no improvement or severe symptoms progress (as described in the ASCIA		
	Action Plan for Anaphylaxis), further adrenaline doses may be administered every five		
	minutes, if other adrenaline autoinjectors are available.		
5.	Contact the student's emergency contacts.		
	,		

If a student appears to be having a severe allergic reaction, but has not been previously diagnosed with an allergy or being at risk of anaphylaxis, school staff should follow steps 2-5 as above.

Schools can use either the EpiPen[®] and Anapen[®] on any student suspected to be experiencing an anaphylactic reaction, regardless of the device prescribed in their ASCIA Action Plan.

Where possible, schools should consider using the correct dose of adrenaline autoinjector depending on the weight of the student. However, in an emergency if there is no other option available, any device should be administered to the student.

[Note: If in doubt, it is better to use an adrenaline autoinjector than not use it, even if in hindsight the reaction is not anaphylaxis. Under-treatment of anaphylaxis is more harmful and potentially life threatening than over-treatment of a mild to moderate allergic reaction. Refer to 'Frequently asked questions' on the <u>Resources tab</u> of the Department's Anaphylaxis Policy.]

Communication Plan

This policy will be available on Bright P12 College's website so that parents and other members of the school community can easily access information about Bright P12 College's anaphylaxis management procedures. The parents and carers of students who are enrolled at Bright P12 College and are identified as being at risk of anaphylaxis will also be provided with a copy of this policy.

The Assistant Principals are responsible for ensuring that all relevant staff, including casual relief staff, canteen staff and volunteers are aware of this policy and Bright P12 College's procedures for anaphylaxis management. Casual relief staff and volunteers who are responsible for the care and/or supervision of students who are identified as being at risk of anaphylaxis will also receive a verbal briefing on this policy, their role in responding to an anaphylactic reaction and where required, the identity of students at risk.

The Principal is also responsible for ensuring relevant staff are trained and briefed in anaphylaxis management, consistent with the Department's <u>Anaphylaxis Guidelines</u>.

Staff training

The principal will ensure that the following school staff are appropriately trained in anaphylaxis management:

• School staff who conduct classes attended by students who are at risk of anaphylaxis

• Education Support Staff who work directly or indirectly with students at risk of anaphylaxis

Staff who are required to undertake training must have completed:

- an approved face-to-face anaphylaxis management training course in the last three years, or
- an approved online anaphylaxis management training course in the last two years.

Bright P12 College uses the following training course; ASCIA eTraining course 22300VIC.

Staff are also required to attend a briefing on anaphylaxis management and this policy at least twice per year (with the first briefing to be held at the beginning of the school year), facilitated by a staff member who has successfully completed an anaphylaxis management course within the last 2 years. This is the role of the Anaphylaxis Co-ordinator. Each briefing will address:

- this policy
- the causes, symptoms and treatment of anaphylaxis
- the identities of students with a medical condition that relates to allergies and the potential for anaphylactic reaction, and where their medication is located
- how to use an adrenaline autoinjector, including hands on practice with a trainer adrenaline autoinjector

- the school's general first aid and emergency response procedures
- the location of, and access to, adrenaline autoinjectors that have been provided by parents or purchased by the school for general use.

When a new student enrols at Bright P12 College who is at risk of anaphylaxis, the YLC or Classroom Teacher will develop an interim plan in consultation with the student's parents and ensure that appropriate staff are trained and briefed as soon as possible.

A record of staff training courses and briefings will be maintained in the OHS Training Planner.

The principal will ensure that while students at risk of anaphylaxis are under the care or supervision of the school outside of normal class activities, including in the school yard, at camps and excursions, or at special event days, there is a sufficient number of school staff present who have been trained in anaphylaxis management.

COMMUNICATION

This policy will be communicated to our school community in the following ways [please delete the options below in yellow if you do not intend to use these methods. Note that the first two methods are strongly recommended]:

- Available publicly on our school's website
- Included in induction processes for relevant staff
- Included in our staff handbook/manual
- Discussed in an annual staff briefing/meeting
- Made available in hard copy from school Front Office upon request

REVIEW CYCLE AND EVALUATION

This policy was last updated on 25th July 2024 and is scheduled for review in May 2025.

The principal will complete the Department's Annual Risk Management Checklist for anaphylaxis management to assist with the evaluation and review of this policy and the support provided to students at risk of anaphylaxis.
